

1) Definición

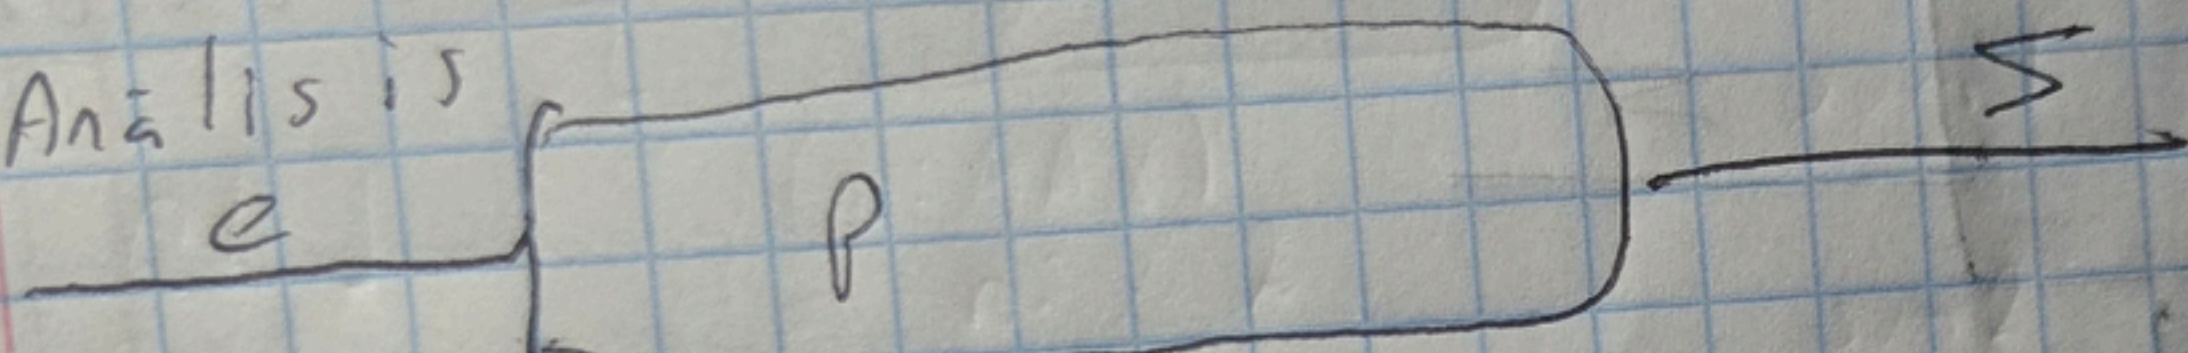

$\Rightarrow$

$$f(n) := \begin{cases} \text{I. } \triangleleft \text{vercio} \end{cases} n$$

$$g(n, m) := \begin{cases} \text{II. } \triangle \end{cases} n$$

2) Analisis

$n1$
 $n2$
 m

```
f(n):
for (i: n-1)
for (j: n-1-i)
printf(" ")
for (k: i)
printf("x")
printf("\n")
```

imprimir f(n)

```
g(n, m):
for (i: n)
for (j: m)
printf("x")
printf("\n")
```

imprimir g(n, m)
